

Flávia Dias

Leeds, England • 07588847788 • flaviadias97@yahoo.com • [LinkedIn](#) • [GitHub](#) • [MyPortfolio](#)

Healthcare professional transitioning into data analysis, with hands-on experience using Python, Pandas, SQL and data visualisation to analyse datasets and communicate insights. Experienced in healthcare operations, handling confidential information, maintaining accurate records, and supporting multidisciplinary teams in fast-paced environments. Recently developed practical data projects, including an NHS operational performance dashboard and an employee retention analytics project using Python, SQL, SQLite and Streamlit. Strong problem-solving, attention to detail and analytical thinking, with a background in digital technology and front-end development. Bilingual in English and Portuguese (Native).

SKILLS

- **Data & Analysis Tools:** Python (Pandas), SQL, SQLite, Excel (data cleaning, pivot tables), data analysis and interpretation
- **Reporting & Visualisation:** Streamlit, Matplotlib, dashboard development, KPI reporting and data visualisation
- **Technical:** Git, GitHub, HTML, CSS, JavaScript, VS Code
- **Analytical Skills:** Data cleaning, pattern recognition, problem-solving, trend identification, attention to detail
- **Professional Skills:** Healthcare operations, confidential data handling, communication, prioritisation, working under pressure

EDUCATION

- **BA (Hons) Creative Arts – 2:1**
Leeds Beckett University | 2020

Developed strong visual communication, analytical thinking and structured problem-solving skills. Gained experience interpreting information, presenting ideas clearly, working with detail, and communicating effectively through creative and digital projects.

CERTIFICATIONS

- **Web Design & Development Bootcamp**
The Coders Guild - Skills Connect | 2024

Completed an intensive web design and development programme covering HTML, CSS, JavaScript, responsive design, Git and GitHub. Developed practical experience with front-end development, version control, debugging, problem-solving and building user-focused digital solutions.

- **Python & Apps Programme**
Code First Girls | 2024

Completed a Python and app development programme covering programming fundamentals, data structures, problem-solving, debugging and application development. Developed practical programming skills and strengthened analytical thinking through hands-on coding projects.

SELECTED PROJECTS

NHS Operational Performance Dashboard | Python, Pandas, SQL, SQLite, Streamlit

- Generated, cleaned and analysed synthetic NHS operational data using Python and Pandas to explore patient activity, waiting lists, workforce indicators and patient experience.
- Used SQL and SQLite to analyse operational performance, including waiting times, appointment activity, workforce absence and patient satisfaction.
- Developed an interactive Streamlit dashboard with KPIs and visualisations to communicate findings and highlight potential areas for further investigation.

Employee Retention Analytics | Python, Pandas, SQL, SQLite, Streamlit

- Analysed a 1,000-record employee dataset using Python and Pandas to identify patterns in attrition across departments, roles, tenure and job satisfaction.
- Built a SQLite database and used SQL queries to analyse attrition, salaries, tenure and workforce trends.
- Developed an interactive Streamlit dashboard with KPI cards and filters to explore employee retention and attrition patterns.

PROFESSIONAL EXPERIENCE

NHS Trust England

Ward Clerk

07/24 - Present

Leeds,

- Maintain accurate and confidential patient and administrative information using digital systems.
- Coordinate information and communication between healthcare professionals while supporting daily operational workflows.
- Prioritise competing tasks in a fast-paced environment, maintaining accuracy, organisation and attention to detail.

NHS Trust England,

Clinical Support Worker

02/19 -06/23

Leeds,

- Provided direct patient care and support within busy healthcare environments, working closely with multidisciplinary clinical teams.
- Monitored and recorded patient observations, communicated changes in patient wellbeing, and followed established healthcare procedures.
- Developed strong communication, attention to detail, teamwork and ability to work effectively under pressure while maintaining patient safety and confidentiality.
