

Flávia Dias

Leeds, England • 07588847788 • flaviadias97@yahoo.com • [LinkedIn](#) • [GitHub](#) • [MyPortfolio](#)

Junior Developer with a background in healthcare, focused on building responsive, accessible, and user-centric web applications. Proficient in HTML, CSS, JavaScript, and React, with practical experience developing component-based interfaces and interactive features through personal and project work. Demonstrates strong problem-solving skills, attention to detail, and new technologies while balancing real-world responsibilities. Bilingual in English and Portuguese. (Native)

SKILLS

- **Frontend:** HTML5, JavaScript (ES6, DOM manipulation), some React.js
- **Tools:** Git & GitHub, GitHub Desktop
- **Additional Exposure:** Intro to Python by Code First Girls in July 2024

EDUCATION

- **BA (Hons) Creative Arts – 2:1**
Leeds Beckett University | 2020

Studied creative arts with a focus on visual communication, design principles, creativity, and digital media. Developed strong skills in design thinking, problem-solving, user-focused creativity and visual storytelling, which translate well into front-end development and UI/UX design. Gained experience presenting ideas, working independently and collaboratively, and creating engaging visual content with attention to detail and aesthetics.

CERTIFICATIONS

- **Web Design & Development Bootcamp**
The Coders Guild – Skills Connect | 2024

Completed an intensive web design and development bootcamp focused on building a responsive and user-friendly website. Develop practical skills in HTML, CSS, JavaScript, responsive design, GitHub, and front-end development workflows. Gained hands-on experience creating projects, improving website performance, problem-solving, and applying modern design principles to deliver accessible and visually engaging web experiences.

- **Python & Apps Programme**
Code First Girls | 2024

Completed a Python and app development programme covering programming fundamentals, problem-solving, and software development concepts. Developed skills in Python, application logic, debugging, teamwork and analytical thinking while building practical coding projects. Strengthened understanding of how technology can be used to create efficient and user-focused digital solutions.

PROFESSIONAL EXPERIENCE

NHS Trust
England

Leeds,

Ward Clerk

02/24 - Present

Worked in a fast-paced hospital environment providing administrative and operational support to multidisciplinary healthcare teams. Managed patient records, coordinated communications, handled confidential information, and ensured the smooth running of daily ward operations through strong organisation and attention to detail. Developed excellent problem-solving, prioritisation, and communication skills while working under pressure, alongside adaptability to digital systems and workflows that are transferable to front-end development and tech environments.

NHS Trust
England,

Leeds,

Healthcare

04/17 -08/22

Provided compassionate care and support to patients with a wide range of physical and emotional needs within busy healthcare settings. Assisted with daily care routines, monitored patient wellbeing, communicated effectively with healthcare professionals and families, and adapted quickly to changing situations and procedures. Developed a strong user-focused mindset, empathy, teamwork, and adaptability, alongside the ability to learn new systems and processes efficiently.
